Study AI in Ophthalmology

LMU Munich and the Technical University of Applied Sciences Augsburg are conducting an interview study on artificial intelligence (AI) in ophthalmology. The goal of this study is to develop a deeper understanding of how ophthalmology professionals perceive AI in ophthalmology. This interview study aims to shed light on factors that are relevant for the introduction of AI tools into clinical practice and to identify the needs of potential users of ophthalmic AI.

Ophthalmology professionals (e.g., ophthalmologist, assistant, optometrist, ...)

20-25 min **online interview**
